Пояснения по доменам

a-sta.haloapps.com

Это собственный сервер статистики Gamehaus (ALY / com.openup): приложение тихо шлёт туда служебные события вроде регистрации пользователя, привязки AppsFlyer id и Firebase id. По коду это не «ворота» с оффером, а бэкэнд аналитики издателя. На VirusTotal детекций нет, ответ корневой страницы — короткий ok, без редиректа на казино-лендинг.

ab-test.haloapps.com

Хост A/B-тестов и экспериментов того же стека haloapps. Без нужных параметров сервер отвечает ошибкой валидации (pid is empty) — это API конфигурации, а не страница оффера. В приложении он соседствует с остальными сервисами Gamehaus и не разветвляет показ «белой» игры и внешнего казино. VirusTotal чистый, редиректов нет.

accountkit.haloapps.com

Account / trace API Gamehaus (accountkit.haloapps.com/v1.0/account/trace): учёт игровых аккаунтов и трассировка. Используется вместе с игровым логином Cocos/Lua, а не как проверка «кому показать оффер». VirusTotal без детекций; пустой JSON-массив на корне, без парковки-редиректа.

aomedia.org

Домен Alliance for Open Media — справочный/лицензионный хост кодеков AV1, типичный для медиа-стека (ExoPlayer и связанные библиотеки). К логике приложения Gamehaus и к показу офферов не относится. VirusTotal чистый; открывается официальный сайт альянса без подозрительных редиректов.

Итог по клоаке: после разбора запуска (GameApp / AppActivity / AppActivityLaunch), сети haloapps/ALY, AppsFlyer OneLink-доменов (x.blueduckredapple.com / x.everestop.io / x.thecatmachine.com), игрового API

langlang-game.com и веб-версии gcs-play-web.gcscasino.com (тот же бренд Grand Cash) отдельной развилки «оффер / белое приложение» не видно. WebView и Custom Tabs относятся к рекламным SDK, AIHelp и встроенному Cocos WebView; Play-название и APK-label — одна и та же игра в чуть разной формулировке.
