Пояснения по доменам

Про домен capacitorjs.com

Это официальный сайт фреймворка Capacitor, на котором собрано это приложение. Адрес встречается в служебном комментарии к файлу native-bridge.js (лицензия MIT), а не как сервер, на который приложение шлёт данные пользователя. Страница открывается как документация Capacitor без перехода на сторонние рекламные или казино-сайты. По проверке VirusTotal детекций нет — на вид обычный сайт разработчиков фреймворка.

Про домен chat.stenciljs.com

Ссылка на Discord-чат сообщества Stencil лежит в тексте ошибки библиотеки Stencil внутри веб-части приложения. Приложение само туда не ходит при запуске: это подсказка для разработчика, если компонент Stencil сломался. При открытии адрес перенаправляет на приглашение в Discord. Детекций на VirusTotal нет, выглядит как обычная поддержка open-source проекта.

Про домен config.ru

Это не настоящий сетевой адрес приложения, а имя языкового сплита Android (config.ru для русской локали) из списка split APK. В коде нет запросов на домен config.ru — совпадение с доменным именем случайное. Проверка страницы завершилась таймаутом, отдельного контента приложения там нет. Для работы программы этот «домен» не используется.

Про домен issues.chromium.org

Адрес баг-трекера Chromium встречается в комментарии Capacitor про обход проблемы Android WebView. Приложение не открывает этот сайт пользователю и не шлёт туда данные. При проверке открывается обычная страница входа Chromium Issues. VirusTotal без детекций — это инфраструктура Google/Chromium.

Про домен mozilla.github.io

Ссылка на документацию localForage (хранилище в браузере) вшита в библиотеку jeep-sqlite. Это справочный URL из сторонней библиотеки, а не сервер офферов. Корень mozilla.github.io отвечает «Site not found»; нужная страница — раздел документации localForage. По VirusTotal чисто, регистратор MarkMonitor.

Про домен stackoverflow.com

Ссылка на вопрос Stack Overflow стоит в комментарии Capacitor про обмен данными с WebView. Приложение не загружает Stack Overflow при работе с финансами пользователя. При открытии видна стандартная защита/заглушка сайта. Это крупный публичный форум для разработчиков, не связанный с раздачей офферов.

Про домен stenciljs.com

Официальный сайт Stencil — библиотеки веб-компонентов, которую тянет jeep-sqlite/Stencil runtime. Адрес есть в сообщении об ошибке про externalRuntime, а не в логике показа рекламы. Страница открывается как документация Stencil без подозрительных редиректов. VirusTotal без срабатываний.

Про домен stuk.github.io

Ссылка на документацию JSZip (как читать zip) внутри jeep-sqlite. Нужна библиотеке при работе с архивами баз, а не для перехода пользователя на внешний сайт. Корень stuk.github.io сейчас отдаёт 404 GitHub Pages. Детекций нет — обычная документация open-source утилиты.
