Пояснения по доменам

angular.dev

Официальный сайт документации фреймворка Angular. В минифицированном web-бандле приложения встречаются ссылки на лицензии и материалы Angular (angular.dev / angular.io). Это справочные URL фронтенд-стека, а не «gate» проверки трафика. VirusTotal чистый; редиректов на оффер нет — открывается документация Angular.

angular.io

Старый домен документации Angular: с корня редиректит на angular.dev. В APK фигурирует рядом с angular.dev как ссылка лицензии/доков встроенного Angular UI. К схеме «кому показать казино-оффер» не привязан; это инфраструктура фреймворка, на котором собрана локальная HTML/JS часть приложения.

aomedia.org

Сайт Alliance for Open Media (кодеки AV1 и смежные медиа-стандарты). В нативных строках APK встречается как справочный хост из медиа-стека (androidx.media / exoplayer), без логики показа внешнего казино-оффера. VirusTotal чистый; для клоакинга не используется.

appassets.androidplatform.net

Служебный хост Android для Digital Asset Links / WebView asset mapping. В экосистеме Capacitor/AndroidX WebKit такие имена бывают встроены в SDK. DNS у корня сейчас не резолвится — типично для служебного имени без публичной витрины. Это не кастомный gate и не лендинг оффера.

capacitorjs.com

Официальный сайт Capacitor (Ionic) — нативной оболочки, в которой работает приложение (BridgeActivity / CapacitorWebView, плагины @capacitor/*). В dex/ресурсах домен встречается как ссылка фреймворка. VirusTotal чистый; страница — документация Capacitor, не проверка «белая версия / оффер».
