SharedPreferences:

Unity PlayerPrefs (через PlayerPrefsUtils / .v2.playerprefs): UserId, Inventory, ScratchOnboarding, PushNotificationLastToken, ADSettingsKey, AutoLBUser; аккаунт и инвентарь (PlayerPrefsAccountService / PlayerPrefsInventoryService); tutoriales, rewarded/segment, streak/shield/slot. Firebase Remote Config кэширует AdsConfig, модели мини-игр (ChickenRoad, Plinko, Mine, Limbo и др.), PrivacyPolicy, TermsOfUse, IapProducts. Также prefs SDK: Adjust, Firebase/GMS Measurement (com.google.firebase.common.prefs, com.google.android.gms.measurement.prefs, google.analytics.deferred.deeplink.prefs), Facebook USER_SETTINGS, AppLovin/ad networks, AndroidX DataStore Preferences.

Есть ли клоака:

нет — полноценная Unity IL2CPP-игра Joker.games с мини-играми и Admediation; нет white/black page, organic→web-offer, Keitaro/Binom. Есть Firebase Remote Config, CRM (crm.jokergame.net), Adjust, PairIP и queries к Magisk/SuperSU; WebView/Custom Tabs в основном у рекламных SDK и Facebook — признаков классической клоаки нет.
