SharedPreferences	Да. Используется Flutter SharedPreferences / DataStore (файл FlutterSharedPreferences / datastore/FlutterSharedPreferences.preferences_pb и com.chicken.jump.road.pump_preferences). Ключи игрового прогресса и настроек: voyage_balance, free_spins_count, wheel_last_spin_date, starter_bonus_claimed_v1, megaroad_consent_accepted_v1, audio_music_on/volume, audio_sound_on/volume, settings_notifications_on, settings_vibration_on, bet_history, exchange_usd_wallet, exchange_payment_method, exchange_payment_detail, exchange_lifetime_winnings_total, store_cd_*, wallet_pay, google_pay, samsung_pay, credit_card; также строка/флаг externalOffer. StartApp хранит свои prefs: com.startapp.sdk, com.startapp.sdk.extras, com.startapp.android.publish.CookiePrefsFile, StartApp-* (хешированные имена). GMS: app_set_id_storage, com.google.android.gms.signin.
Есть ли клоака	да — в Dart AOT есть сущность externalOffer с валидацией http/https URL и открытием через Custom Tabs; игровой фасад Chicken Road сочетается с cash-out/wallet/BTC и внешними офферами. Дополнительно StartApp GeoIP (geoip.api.p3insight.de). Классического отдельного cloaking SDK (Keitaro/Binom и т.п.) в бинарнике не обнаружено.

Краткие выводы

- Приложение на Flutter с нативной Android-обёрткой (Kotlin 2.1.0, AGP 8.9.1, minSdk 25 / targetSdk 36).
- Монетизация: StartApp ads + Google Play Billing; аналитика AppMetrica; Firebase/AdMob/OneSignal не интегрированы.
- Есть WebView (StartApp) и Custom Tabs (Flutter plugin) для внешних URL; признак офферной клоаки через externalOffer.
