Есть ли клоака	нет
Подозрительные слова	нет

Подозрительных кастомных доменов нет: в приложении используются официальные хосты Amazon (amazon.com / региональные витрины), Google/Firebase и Bugsnag — крупные известные сервисы, в таблицу «Подозрительные домены» не входят. Развилки оффер/белая версия, тихой gate-проверки и подмены Store-названия относительно APK-label не видно: это обычное приложение Amazon Shopping с WebView маркетплейса, weblab/A-B и собственной рекламой/метриками.
