Пояснения по доменам

adgen-self.mywavia.com — Это основной игровой сервер разработчика Mywavia. По коду с него забирают удалённый конфиг (/config), аккаунты и мультиплеер (/gameserver_roul), турниры, проверку покупок (/vfy) и очки лидерборда. Ответ конфига настраивает рекламу и внутриигровые пакеты фишек, а не развилку «внешний казино-сайт или обычное приложение». VirusTotal без детекций; корень сейчас отдаёт 404.

classspace.in — В приложении это коллектор аналитики Snowplow (classspace.in:9443) и хост для файлов профиля (/files/). Снаружи сайт выглядит как образовательный Class Space. К проверке «кому показать оффер» не привязан. VirusTotal чистый.

configservice.mywavia.com — Сервис Mywavia для экрана «ещё приложения» (more?appid=...) и служебных файлов (US_isocc.txt, списки турниров). Код открывает его во встроенном окне сайта как каталог других тайтлов, без подмены игры внешним гемблинг-лендингом. VirusTotal без детекций.
