Куда редиректит	нет (DNS не резолвится)
Что выводит (кратко)	нет (DNS не резолвится)
Где припаркован	нет данных

Строка <https://www.123.com> лежит в DEX рядом с URL рекламных и support-SDK (Helpshift webchat, InMobi, Supersonic). Это не игровой backend и не адрес «тихой» проверки трафика: DNS у домена не резолвится, живого ответа нет. На старте приложение поднимает Cocos2d-x (BoleApplication → AppActivity), Adjust, Helpshift, AdMob и Firebase — без ветки «открыть внешний оффер / оставить оболочку» по ответу с 123.com. По смыслу строка выглядит как мёртвый placeholder внутри SDK, а не рабочий gate клоаки. Play-название Lotsa Slots и label APK Lotsa Slots — один продукт SpinX, не белая оболочка.
